1.The Master’s program of “Anthropology and Ethnology”

(1) Program Introduction

The Master’s program of “Anthropology and Ethnology” offers two tracks: Applied Anthropology and Ethnic Study. The program aims to cultivate versatile professionals who will engage in teaching, research, and other jobs related to Ethnology and relative fields and to provide intellectual resources for the development of high-quality, top-level talent in Ethnology. Graduates of this program are expected to possess a systematic understanding of the basic theories and methodologies in the field, stay abreast of the latest development in the discipline and cultivate the ability of conducting fieldwork and research independently. Students are expected to specialize in a particular area, develop innovative thinking, and possess self-improvement capabilities. They will be trained to develop proficiency in reading foreign-language literature.

(2) Main Specialties

Applied Anthropology; Ethnic Study

(3) Curriculum

▶Public Compulsory Courses

Chinese Language; Chinese Culture

▶Public Optional Courses

Introduction of China

▶Major Compulsory Courses

Theories in Anthropology and Ethnology; Reading Ethnography; Research Methods in Anthropology; Academic Integrity and Scholarly Writing

▶Major Specialty Courses

Anthropology of Development; Urban Anthropology; Ethnic Study of China; Society and Culture in Contemporary China

▶Major Optional Courses

Comparative Urbanism: Tactics for Global Cities; Biosocial Study of Human Behavior; Sexuality and Gender Study; Ethnopsychology; World Languages

▶Make-up Courses

Core Course 1 in the undergraduate program; Core Course 2 in the undergraduate program

▶Extended Courses

Elementary Academic Writing in Chinese

▶Social Practice

▶Fieldwork

For master's students, the fieldwork duration is expected to last no less than 4 months. The specific time and location will be determined by the advisor and student in accordance with the basic requirements of the training program.

2.The Master’s program of “Religious Studies”

(1) Program Introduction

The English-language master's program in religious studies focuses on "Chinese religions and world religions", aiming to cultivate high-level talents who can not only innovate in the theoretical research of religious studies, but also contribute to the promotion of cultural exchanges between China and foreign countries. After training in this course, students will have general humanistic literacy, philosophic thinking skills, and also specialized knowledge of religion and a critical understanding of multicultural traditions. By deepening international students' understanding of religion and enhancing their recognition of Chinese culture, this course will promote the construction of students' "three abilities": being able to think deeply about the history of world religions in China; being able to have a deeper understanding of the inner connection between religion and Chinese culture; being able to more deeply appreciate the dialectical relationship between the world background of Chinese religion and its local characteristics.

(2) Main Specialties

Religious Studies; Christianity; Buddhism; Islam

(3) Curriculum

► Public Compulsory Courses

Chinese Language; Chinese Culture

► Public Optional Courses

Introduction of China

► Major Compulsory Courses

Introduction to Religions of China; Interreligious Dialogue; Philosophy of Religion; Chinese Christianity; Chinese Buddhism; Chinese Islam; Classics in Religious Studies

► Major Optional Courses

Seminar on Christian Theology; Buddhist Ethics; History of Islam; Bible in China; World Christianity

► Extended Courses

Academic Writing in Chinese

► Social Practice

3. The Master's program of "Chinese History"

(1) Program Introduction

This major is aimed at enrolling students from the 'Belt and Road' countries, striving to build a continuous interactive cultivation system. With harmonious cooperation as the main theme, it promotes cultural exchanges through historical education and teaching, jointly building the 'Belt and Road'. It deeply integrates the main educational experiences of specialized historical disciplines such as ethnic history and ethnic relations history. It offers two major characteristic course series: Ancient Chinese-Foreign Relations History and Modern Chinese-Foreign Relations History, with a focus on several courses that reflect the interactive process and the history of communication exchanges of Chinese civilization with other countries in the world. These courses demonstrate the splendid material culture and highly developed civilization of ancient China. They specifically outline and organize the modern Chinese-foreign relations from the perspective of China's relations with neighboring countries and the transformation of China's foreign relations, all to varying degrees deepening the understanding of the developmental history of China's relationship with the world.

The aim is to cultivate high-level international students who are friendly to China, possess an inclusive cognition, and are aware of cultural diversity.

(2) Main Specialties

Chinese history before 1840; Modern and Contemporary Chinese History (from the Opium War to the early establishment of the People's Republic of China); Ancient Cultural Relics and the Silk Road; History of Modern Sino Foreign Relations; Research on the History and Culture of Ethnic Groups in Southern China; History of China's Relations with Southeast Asia, South Asia, and Central Asian Countries (including Ancient World History and Modern World History)

(3) Curriculum

►Public Compulsory Courses

Chinese Language; Chinese Culture

►Public Optional Courses

Introduction of China

►Major Compulsory Courses

Chinese Ancient History; Modern China: an Introductory History; Introduction to Global History

►Major Optional Courses

Ancient Cultural Relics and the Silk Road; Chinese Ethnic Groups in Western World; The Transformation of Foreign Relations in Modern China; Historical Relations between China and Neighboring Nations; Chinese and Foreign Ethnography; Chinese Religion and Ethnicity

4.The Master’s program of “Linguistics and Applied linguistics”

(1) Program Introduction

The teaching affairs for the all-in-English postgraduate program of linguistics and applied linguistics is co-organized by the College of International Education and the School of Chinese Ethnic Minority Languages and Literature. The School of Chinese Ethnic Minority Languages and Literature, one of the departments with the longest history in MUC, boasts more than 1,500 teachers and students from all ethnic groups, and consists of 6 teaching departments of Chinese ethnic minority languages and literature and 1 Chinese language teaching department. It is the largest and most complete teaching and research institution in the field of Chinese ethnic minority languages and literature in China. Linguistics and Applied Linguistics has been the leading major in the School of Chinese Ethnic Minority Languages and Literature. The all-in-English postgraduate program aims to cultivate senior professionals with a sound personality and a friendly attitude towards China who systematically master the theoretical knowledge and practical skills of linguistics, understand the academic frontier of this major, and have the capacities to analyze, research and solve linguistic problems in practice.

(2) Main Specialties

Applied Linguistics; Sociolinguistics

(3) Curriculum

►Public Compulsory Courses

Chinese Language; Chinese Culture

▶Public Optional Courses

Introduction of China

▶Specialized Fundamental Courses

Introduction to Classics of Linguistic Theories; Introduction to Chinese Ethnic Minority Languages; Special Study on Grammar

▶Specialty-Oriented Courses

Statistical Linguistics; Introduction to the Second Language Acquisition; Corpus Linguistics; Sociolinguistics; Basis of Phonetics

▶Major Optional Courses

Basis of Ethnologies (Kazakh, Mongolian, Tibetan, Uyghur); Chinese Popular Language and Culture; Cross-cultural Communication; Introduction to Semantics and Pragmatics; Language Typology ; Criticism of Contemporary Western Literature

▶Remedial Courses

Introduction to Linguistics

▶Social Practice

Language survey, teaching practice, attending academic lectures, academic salons, etc.

5.The Master’s program of “International Business”

(1) Program Introduction

Practice the concept of a community with a shared future for mankind, and adhere to the international business principles of extensive consultation, joint contribution, sharing, cooperation and win-win, in order to cultivate applied and innovative senior business talents with good moral cultivation, good professional conduct and good international vision, and be able to engage in international trade, international investment, multinational business, and be competent for international business work in foreign-related enterprises and institutions, government departments and social organizations, and be capable of participating in international affairs and international competition.

(2) Main Specialties

Research on economic and trade issues in different countries; Research on Sino-foreign economic and trade cooperation

(3) Curriculum

▶Public Compulsory Courses

Chinese Language; Chinese Culture

▶Public Optional Courses

Introduction of China

▶Specialized Fundamental Courses

Intermediate microeconomics; Intermediate macroeconomics; Statistics; Econometrics

▶Specialty-Oriented Courses

International business; International trade; Theory and practice of international finance; International trade practice

▶Major Optional Courses

International settlement; Public finance; International taxation; International human resource

management; The Belt and Road economic and trade cooperation

▶ Extended Courses

Academic norms and thesis writing; Essay writing guide

▶ Professional practice in international business

6.The Master’s program of “Journalism and Communication”

(1) Program Introduction

The English Master's Program in Journalism and Communication at the School of Journalism and Communication, Minzu University of China, is a three-year, fully English-taught program designed for international students. This program is dedicated to cultivating high-level professionals with a solid theoretical foundation, comprehensive professional knowledge, proficient skills, and an international perspective in the field of cross-cultural journalism and communication research and application. The program offers three research directions: Intercultural Communication Studies, Communication Theory and Application, and New Media and Communication. It comprises various course modules, including mandatory courses such as Global Communication History, Intercultural Communication, and Film and Television Cultural Communication. Elective courses cover specialized subjects like Advertising Creativity and Performance, Chinese Popular Language and Culture, as well as foundational courses like Basic Chinese, Chinese Culture, and History and Culture of "Belt and Road" Countries. The faculty of this program has overseas backgrounds, having studied and conducted research at renowned universities and academic institutions worldwide. Each student has the opportunity to engage in academic research under the one-on-one guidance of a mentor. Applicants and candidates must be non-Chinese citizens who meet the criteria specified in the regulations for the recruitment and education of international students at Minzu University of China.

(2) Main Specialties

Intercultural Communication Studies; Communication Theory and Application; New Media and Communication

(3) Curriculum

▶ Public Compulsory Courses

Chinese Language; Chinese Culture

▶ Public Optional Courses

Introduction of China

▶ Major Compulsory Courses

History of Human Communication; Communication Theory; Research on Media Policy, Laws and Ethics; Intercultural Communication; Social Media Strategy; Digital Marketing Communication; Media Industry Studies; Cross-Cultural Studies on TV & Film

▶ Major Optional Courses

Commercials Creativity and Production; Research on Integrated Marketing Communication; Chinese Popular Language and Culture

▶ Social Practice

7.The Master’s program of “Environmental Science and Engineering”

(1) Program Introduction

Through three years of course study and scientific research practice training, students can have scientific thinking and innovation ability, master the ideas, methods and technologies to solve environmental problems, and lay a solid professional foundation for independent teaching, scientific research, management and technology development in Environmental Science in the future. The following knowledge, skills and qualities are required:

- 1.1 Master the basic knowledge, skills and methods of environmental research; Understand the academic frontier and research trends in the research field;
- 1.2 Master the basic methods of data query, literature retrieval and know how to apply modern technology to obtain information;
- 1.3 Be able to finish experimental design, data processing, results analyzing and paper writing;
- 1.4 Have rigorous attitude and innovative consciousness in scientific research, and be able to independently engage in the practical work related to this major;
- 1.5 Have Strong academic communication ability and sense of cooperation with others.

(2) Main Specialties

Environmental Analytical Chemistry; Environmental Pollution Chemistry; Water Pollution Control Technology; Water Environment Assessment and Watershed Planning; Solid waste disposal and Risk Management

(3) Curriculum

► Public Compulsory Courses

Chinese Language; Chinese Culture

► Public Optional Courses

Introduction of China

► Major Compulsory Courses

Mathematical Methods in the Environmental Sciences; Literature Reading and Academic Writing; Environmental Impact Assessment; Environmental Chemistry; Air pollution control technology; Resource Utilization and Disposal of Solid Waste; Air pollution control technology; Water environment simulation and prediction

► Major Optional Courses

Environmental monitoring technology; Application of modern analytical technology; Computer-aided engineering drawing using AutoCAD; Remote sensing and geographic information system; Advanced instrument analysis; Environmental health and toxicology; Environmental risk control; Environmental planning and management; The Application of R language in Environmental Studies

► Remedial Courses

Advanced mathematics; Analytical chemistry

8. The Master's program of "Ecology"

(1) Program Introduction

Through a three-semester program of study and practical scientific research training, students can master theories, methods and related technologies for carrying out research on ecology and related issues; and are provided with a strong foundation in independently conducting scientific research, teaching, professional research, management and development in ecology and related fields in the

future. For postgraduates participating the Master's in the first-class subject of Ecology program, the goals on knowledge, skills and qualities with professional study and training are as the following:

1.1 Master the basic knowledge, skills and methods of ecology-related research directions; track the frontiers and latest trends in the field of study;

1.2 Master the basic skills of data query, document retrieval and application of modern information technology to obtain relevant professional knowledge and information;

1.3 Develop the ability in experimental design and knowledge in experimental techniques and research methods, be able to analyze and discuss experimental data and research results, and write professional scientific papers;

1.4 Have a rigorous attitude towards scientific research and a sense of innovation in scientific research, and be able to independently engage in practice related to the major;

1.5 Have strong communication skills and a sense of cooperation in academic research.

Through the program, build up students' good physical, mental quality and team spirit for the academic research, capacity of independent teaching, scientific research, development and management, and to make students innovative and management-oriented type of senior knowledge talents poised prepared for career in scientific research, teaching, management and other work in scientific research institutions, institutions of higher learning, enterprises and institutions, and administrative departments.

(2) Main Specialties

Landscape ecology; Conservation biology; Plant ecology

(3) Curriculum

► Public Compulsory Courses

Chinese Language; Chinese Culture

► Public Optional Courses

Introduction of China

► Major Compulsory Courses

Fundamental Ecology and Frontier; Ecological Research Methods; Biostatistics and Data Analysis

Landscape Ecology; Conservation Biology; Animal and Plant Ecology

► Major Optional Courses

Molecular Ecology; Global Ecology

► Extended Courses

Chinese Essay Writing

► Chinese social cognition practice
